LEVEL 1

BUSY BUSY CALENDAR

MON | TUE | WED | THU | FRI | SAT | SUN

First, name your Characters

On this day, circle who are free?

WED

SAT

SUN

LEVEL 2

BUSY BUSY CALENDAR

MON	TUE	WED	THU	FRI	SAT	SUN

Who do you want to go to these places with? Drag them to the circle below. 😃

Ice cream on Tuesday

Six Flags on Friday

Church on Sunday

Drag & drop your characters from here

CALENDAR GAME

HOW TO PLAY

LEVEL 1:
1) Let the player name their characters on top right using text box. (optional) The teacher can fill in the names given by the player
2) The player looks at the "busy" calendar. If any character is placed on a given day, they are to be assumed "busy" for that day.
3) The player is to find out which characters are free from looking at the busy calendar.
4) Using the pen tool, the player circles the characters free on a given day in the space provided on the right side.

LEVEL 2:
1) The player looks at the "busy" calendar. If any character is placed on a given day, they are to be assumed "busy" for that day.
2) The player is to find out which characters are free from looking at the busy calendar.
3) The player is to drag a character (who is "free") from the bottom bar to do the activities placed on the right side.
4) Some days have only one character free to judge the player's analytical skills. There is only one correct answer in this case (For ex:- ice cream on Tuesday)
5) Some days we have multiple characters who are free. It is upon the player who they decide to do the activity with. There is scope here to engage in dialog with the teacher while explaining why they chose who they chose

BUILD YOUR OWN CALENDAR GAME

1. From the circle below, pick and choose the characters you want kids to play with in Level 1 & 2. You can also download characters of your own and copy paste to create multiple copies across jamboard.

Characters

2. Click on a character. Copy (Ctrcl+c) and Paste (Ctrcl+v) them to any other Level dashboard. You can do this multiple times

3. Similarly, pick and choose "places" for Level 2 from here or download your own. Copy-Paste to create multiple copies across dashboard

Locations
